- Restaurants

PRODUCT HIGHLIGHTS

- Zero Hardware Cost
- 100% Scalable Architecture
- Works with any Brand Wi-Fi Radio
- Plug-and-Play Installation
- Remote Network Monitoring
- Most Cost Effective Solution

Coming Soon

- Carrier Offload

ReXi's ÜberWi provides a flexible platform that allows for configuration and management of remote networks from a scalable cloud based management system.

ÜberWi gateways remotely connect, monitor and control Wi-Fi networks across many industries including education, municipalities, retail chains, restaurants, campgrounds, marinas, concerts, and sporting venues. Providing a unified user experience in geographically diverse locations, ÜberWi seamlessly connects to the cloud where it is managed and configured. ÜberWi gateways feature local network routing, NAT and firewall services, in addition to intrusion protection keeping your network safe from unauthorized access. ÜberWi makes managing one or 1,000 networks simple with built-in monitoring tools, reports and a web-based dashboard.
